Safety data sheet Availability & request

REQUEST SHEET / NOT AN ISSUED SDS

What is currently documented

FilaSource is the B2B filament supply brand of Shenzhen Mu Mao Trading Co., Ltd. This sheet helps a buyer request the safety documentation for the exact product being evaluated. [K2]

Item	Source-based information
Responsible supply company	Shenzhen Mu Mao Trading Co., Ltd.
Products identified in supplied test files	PLA 3D Printing Filament; PETG 3D Printing Filament. The PLA file also lists PLA+, Matte and special variants.
SDS status in reviewed materials	No original product-specific SDS was identified in the supplied reports or the reviewed business facts. This is a record of the present source review, not a statement that an SDS cannot exist.
Existing chemical evidence	RoHS reports XUNW260819408KR and XUNW260819409KR, dated 2026-08-24. They do not replace an SDS.

Information needed from the responsible supplier

Supply the exact grade, formulation/variant and color scope; a current product-specific SDS; its revision and language; supplier identification and verified emergency contact; the classification and composition basis; and the responsible author or review contact.

Do not infer safety status
The available restricted-substance results do not establish a non-hazardous classification, food-contact status, transport classification, or safe heating/handling instructions.

Contact FilaSource about a product-specific document
